Advisory Action Before the Filing of an Appeal Brief

Part of Paper No. 20070416

Continuation of 3. NOTE: The proposed claims are amended to include new limitations which were not present in the examined claims. These new limitations would require further search and consideration. For instance, proposed claim 1 includes the new limitation that the the amount of enhancer effective to enhance the intracellular delivery is about 0.01mM to 30mM when said enhancer has a carbon chain length of from 9 to 14 carbon atoms and 0.01mM to 120mM when said enhancer has a carbon chain length of 8 carbon atoms. This would clearly require further search and considerations, as Applicants assert that the prior art used in a 102 rejection does not teach this limitation. MPEP 714.13 states that Applicants cannot, as a matter of right, amend any finally rejected claims, except when an amendment merely cancels claims, adopts examiner suggestions, removes issues for appeal, or in some way requires only cursory review by the examiner. Here, clearly the proposed amendment would require more than a "cursory review." Therefore, the present amendment will not be entered.
